

Thuraya SatSleeve+

Smartphone to Satellite Phone Device

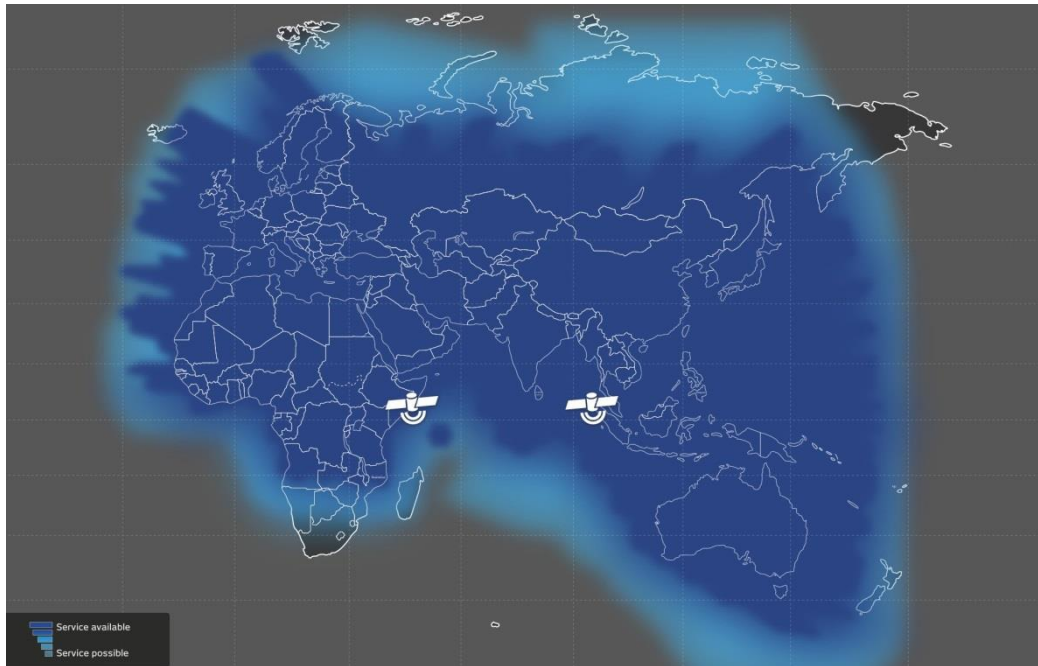

The SatSleeve+ is the latest innovation from Thuraya, transforming your Apple or Android smartphone into a satellite-enabled device. When out of terrestrial coverage, simply dock your smartphone into the SatSleeve+ and click 'satellite mode' to access voice, SMS, email, messaging, social media apps and basic web browsing services.

Features and Benefits

- Data services on the go**
 Bringing 60 kbps for downloads and up to 15 kbps of GmPRS data for email, messaging and light web access on the go.
- Improved voice calling services**
 Audio is routed directly through your smartphone giving enhanced sound quality to voice calls.
- Applications**
 Use Apps such as Facebook, Twitter, WhatsApp and many more.
- Easy to Use**
 Download the user-friendly SatSleeve Hotspot App, then simply connect your smartphone via Wi-Fi to the satellite unit.
- Flexibility**
 You can now use any Apple or Android smartphone with a width of 58-85mm with your SatSleeve+, with the new universal adaptor.
- SOS Button**
 Programmable SOS button lets you pre-define a number of your choice for an outgoing emergency call, even when your smartphone isn't connected.
- Languages**
 English, Arabic, Bahasa Indonesia, Chinese (Simplified), French, German, Italian, Japanese, Korean, Portuguese, Russian, Spanish.
- Coverage**
 Congestion free network for reliable data transfers and access in over 140 countries in Asia, Africa, Europe and the Middle East.

THURAYA COVERAGE

This map represents Thuraya expectations of coverage. Thuraya's satellite network is renowned for being the most powerful satellite network that covers more than 140 countries or two-thirds of the globe. With the high penetration alerting capability (HPA), Thuraya SatSleeve enables you to receive calls even with the satellite antenna stowed, keeping you connected at all times.

PHYSICAL CHARACTERISTICS

Weight

< 256g
